

Kiran Academy — 9 Sept Practical Task

Task 1: Create a database named company_db

```
CREATE DATABASE company_db;
```

Task 2: Use/select the company_db database

```
USE company_db;
```

Task 3: Create the employees table

```
CREATE TABLE employees (  
employee_id INT PRIMARY KEY,  
employee_name VARCHAR(100),  
department VARCHAR(50),  
salary DECIMAL(10,2),  
city VARCHAR(50),  
joining_date DATE,  
status VARCHAR(20)  
);
```

Task 4: Display the structure of the employees table

```
DESCRIBE employees;
```

Task 5: Display all tables available inside company_db

```
SHOW TABLES;
```

Part B — INSERT Operations

```
INSERT INTO employees VALUES (101, 'Rahul Patil', 'Development', 45000, 'Pune', '2026-01-10', 'Active');  
INSERT INTO employees VALUES (102, 'Priya Sharma', 'Testing', 38000, 'Mumbai', '2026-02-15', 'Active');  
INSERT INTO employees VALUES (103, 'Amit Joshi', 'Development', 52000, 'Pune', '2025-12-05', 'Active');  
INSERT INTO employees VALUES (104, 'Sneha Kulkarni', 'HR', 35000, 'Nashik', '2026-03-20', 'Active');  
INSERT INTO employees VALUES (105, 'Rohan Deshmukh', 'Support', 30000, 'Mumbai', '2026-04-01', 'Inactive');  
INSERT INTO employees VALUES (106, 'Anjali More', 'Testing', 42000, 'Pune', '2026-05-12', 'Active');
```

Part C — Basic SELECT Queries

Task 12

```
SELECT * FROM employees;
```

Task 13

```
SELECT employee_name FROM employees;
```

Task 14

```
SELECT employee_name, salary FROM employees;
```

Task 15

```
SELECT employee_name, department, city FROM employees;
```

Task 16

```
SELECT * FROM employees WHERE city = 'Pune';
```

Task 17

```
SELECT * FROM employees WHERE city = 'Mumbai';
```

Task 18

```
SELECT * FROM employees WHERE department = 'Development';
```

Task 19

```
SELECT * FROM employees WHERE department = 'Testing';
```

Task 20

```
SELECT * FROM employees WHERE status = 'Active';
```

Task 21

```
SELECT * FROM employees WHERE status = 'Inactive';
```

Task 22

```
SELECT * FROM employees WHERE employee_id = 103;
```

Task 23

```
SELECT * FROM employees WHERE employee_name = 'Priya Sharma';
```

Task 24

```
SELECT * FROM employees WHERE salary > 40000;
```

Task 25

```
SELECT * FROM employees WHERE salary < 40000;
```

Task 26

```
SELECT * FROM employees WHERE salary = 35000;
```

Task 27

```
SELECT * FROM employees WHERE salary >= 42000;
```

Task 28

```
SELECT * FROM employees WHERE city = 'Pune' AND status = 'Active';
```

Task 29

```
SELECT * FROM employees WHERE department = 'Development' AND salary > 45000;
```

Task 30

```
SELECT * FROM employees WHERE city = 'Pune' OR city = 'Mumbai';
```

Part D — UPDATE Operations

Task 31

```
UPDATE employees SET salary = 48000 WHERE employee_name = 'Rahul Patil';
```

Task 32

```
UPDATE employees SET status = 'Active' WHERE employee_name = 'Rohan Deshmukh';
```

Task 33

```
UPDATE employees SET city = 'Pune' WHERE employee_name = 'Sneha Kulkarni';
```

Task 34

```
UPDATE employees SET department = 'Development' WHERE employee_name = 'Priya Sharma';
```

Task 35

```
UPDATE employees SET salary = 45000 WHERE employee_id = 106;
```

Task 36

```
UPDATE employees SET salary = salary + 3000 WHERE employee_id = 103;
```

Task 37

```
UPDATE employees SET salary = salary + 2000 WHERE department = 'Testing';
```

Task 38

```
UPDATE employees SET city = 'Mumbai Branch' WHERE city = 'Mumbai';
```

Part E — DELETE Operations

Task 39

```
DELETE FROM employees WHERE employee_id = 105;
```

Task 40

```
DELETE FROM employees WHERE employee_name = 'Rohan Deshmukh';
```

Task 41

```
DELETE FROM employees WHERE status = 'Inactive';
```

Task 42

```
DELETE FROM employees WHERE salary < 30000;
```

Task 43

```
DELETE FROM employees WHERE employee_id = 104;
```

Part F — ALTER TABLE / DDL Practice

Task 44

```
ALTER TABLE employees ADD COLUMN email VARCHAR(100);
```

Task 45

```
ALTER TABLE employees ADD COLUMN mobile VARCHAR(15);
```

Task 46

```
ALTER TABLE employees MODIFY COLUMN city VARCHAR(100);
```

Task 47

```
ALTER TABLE employees RENAME COLUMN employee_name TO name;
```

Task 48

```
ALTER TABLE employees DROP COLUMN mobile;
```

Task 49

```
ALTER TABLE employees ADD COLUMN experience INT;
```

Task 50

```
UPDATE employees SET experience = 3 WHERE employee_id = 101;
```

Part G — Table-Level DDL Practice

Task 51

```
CREATE TABLE departments (  
  department_id INT PRIMARY KEY,  
  department_name VARCHAR(100),  
  location VARCHAR(100)  
);
```

Task 52

```
INSERT INTO departments VALUES (1, 'Development', 'Pune');  
INSERT INTO departments VALUES (2, 'Testing', 'Mumbai');  
INSERT INTO departments VALUES (3, 'HR', 'Nashik');
```

Task 53

```
SELECT * FROM departments;
```

Task 54

```
UPDATE departments SET location = 'Pune West' WHERE department_id = 1;
```

Task 55

```
DELETE FROM departments WHERE department_id = 3;
```

Task 56

```
RENAME TABLE departments TO company_departments;
```

Task 57

```
DESCRIBE company_departments;
```

Task 58

```
TRUNCATE TABLE company_departments;
```

Task 59

```
DROP TABLE company_departments;
```

Task 60

```
SHOW TABLES;
```
