

# PRACTICAL TASK - 3

## Task 1: Create database

```
CREATE DATABASE banking_db;
```

## Task 2: Select database

```
USE banking_db;
```

## Task 3: Create accounts table

```
CREATE TABLE accounts (  
    account_id INT PRIMARY KEY,  
    account_number VARCHAR(20),  
    customer_name VARCHAR(100),  
    account_type VARCHAR(30),  
    branch VARCHAR(50),  
    city VARCHAR(50),  
    balance DECIMAL(12,2),  
    credit_score INT,  
    status VARCHAR(20),  
    opened_date DATE  
);
```

## Task 4: Display table structure

```
DESCRIBE accounts;
```

## Task 5: Display all tables

```
SHOW TABLES;
```

## Task 6: Insert Aarav Sharma

```
INSERT INTO accounts VALUES  
(1001, 'ACC10001', 'Aarav Sharma', 'Savings', 'FC Road', 'Pune', 85000, 780, 'Active', '2025-01-15');
```

## Task 7: Insert Priya Patil

```
INSERT INTO accounts VALUES  
(1002, 'ACC10002', 'Priya Patil', 'Current', 'Andheri', 'Mumbai', 145000, 810, 'Active', '2024-11-20');
```

## Task 8: Insert Rohan Joshi

```
INSERT INTO accounts VALUES  
(1003, 'ACC10003', 'Rohan Joshi', 'Savings', 'Baner', 'Pune', 42000, 735, 'Active', '2026-02-10');
```

## Task 9: Insert Sneha Kulkarni

```
INSERT INTO accounts VALUES  
(1004, 'ACC10004', 'Sneha Kulkarni', 'Salary', 'Nashik Road', 'Nashik', 67000, 760, 'Active', '2025-08-05');
```

## Task 10: Insert Vikram Deshmukh

```
INSERT INTO accounts VALUES  
(1005, 'ACC10005', 'Vikram Deshmukh', 'Savings', 'Camp', 'Pune', 18500, 690, 'Dormant', '2023-06-18');
```

## Task 11: Insert Neha More

```
INSERT INTO accounts VALUES  
(1006, 'ACC10006', 'Neha More', 'Current', 'Thane', 'Mumbai', 225000, 825, 'Active', '2024-03-12');
```

## Task 12: Display all records

```
SELECT * FROM accounts;
```

## Task 13: Display customer\_name and account\_number

```
SELECT customer_name, account_number FROM accounts;
```

## Task 14: Display selected account details

```
SELECT customer_name, account_type, balance, status FROM accounts;
```

## Task 15: Display Savings accounts

```
SELECT * FROM accounts WHERE account_type = 'Savings';
```

## Task 16: Display customers from Pune

```
SELECT * FROM accounts WHERE city = 'Pune';
```

#### **Task 17: Balance greater than 50000**

```
SELECT * FROM accounts WHERE balance > 50000;
```

#### **Task 18: Balance less than or equal to 50000**

```
SELECT * FROM accounts WHERE balance <= 50000;
```

#### **Task 19: Balance between 50000 and 200000**

```
SELECT * FROM accounts WHERE balance BETWEEN 50000 AND 200000;
```

#### **Task 20: Credit score >= 750**

```
SELECT * FROM accounts WHERE credit_score >= 750;
```

#### **Task 21: Active accounts**

```
SELECT * FROM accounts WHERE status = 'Active';
```

#### **Task 22: Dormant or Closed accounts**

```
SELECT * FROM accounts WHERE status = 'Dormant' OR status = 'Closed';
```

#### **Task 23: Pune AND Active**

```
SELECT * FROM accounts WHERE city = 'Pune' AND status = 'Active';
```

#### **Task 24: Mumbai OR Nashik**

```
SELECT * FROM accounts WHERE city = 'Mumbai' OR city = 'Nashik';
```

#### **Task 25: Savings OR Salary**

```
SELECT * FROM accounts WHERE account_type = 'Savings' OR account_type = 'Salary';
```

#### **Task 26: Balance NOT BETWEEN 25000 and 100000**

```
SELECT * FROM accounts WHERE balance NOT BETWEEN 25000 AND 100000;
```

#### **Task 27: Customer name starts with A**

```
SELECT * FROM accounts WHERE customer_name LIKE 'A%';
```

#### **Task 28: Customer name ends with a**

```
SELECT * FROM accounts WHERE customer_name LIKE '%a';
```

#### **Task 29: Branch contains Road**

```
SELECT * FROM accounts WHERE branch LIKE '%Road%';
```

#### **Task 30: Top 3 highest balances**

```
SELECT * FROM accounts ORDER BY balance DESC LIMIT 3;
```

#### **Task 31: First 5 accounts**

```
SELECT * FROM accounts LIMIT 5;
```

#### **Task 32: 3 accounts starting from 4th record**

```
SELECT * FROM accounts LIMIT 3, 3;
```

#### **Task 33: Active Savings in Pune with balance > 50000**

```
SELECT * FROM accounts
WHERE city = 'Pune'
      AND status = 'Active'
      AND account_type = 'Savings'
      AND balance > 50000;
```

#### **Task 34: Pune/Mumbai/Nashik with credit\_score >= 750**

```
SELECT * FROM accounts
WHERE city IN ('Pune', 'Mumbai', 'Nashik')
      AND credit_score >= 750;
```

#### **Task 35: Balance >100000 AND credit\_score >=800**

```
SELECT * FROM accounts
WHERE balance > 100000 AND credit_score >= 800;
```

#### **Task 36: Balance range OR credit\_score >800**

```
SELECT * FROM accounts
WHERE balance BETWEEN 50000 AND 150000
      OR credit_score > 800;
```

**Task 37: Active and account\_type NOT Current**

```
SELECT * FROM accounts
WHERE status = 'Active' AND account_type <> 'Current';
```

**Task 38: Customer name contains 'ar'**

```
SELECT * FROM accounts WHERE customer_name LIKE '%ar%';
```

**Task 39: Update Aarav balance**

```
UPDATE accounts SET balance = 95000 WHERE customer_name = 'Aarav Sharma';
```

**Task 40: Update Vikram status**

```
UPDATE accounts SET status = 'Active' WHERE customer_name = 'Vikram Deshmukh';
```

**Task 41: Update Rohan credit score**

```
UPDATE accounts SET credit_score = 755 WHERE customer_name = 'Rohan Joshi';
```

**Task 42: Update Sneha branch**

```
UPDATE accounts SET branch = 'College Road' WHERE customer_name = 'Sneha Kulkarni';
```

**Task 43: Update Priya account type**

```
UPDATE accounts SET account_type = 'Premium Current' WHERE customer_name = 'Priya Patil';
```

**Task 44: Increase account 1006 balance by 25000**

```
UPDATE accounts SET balance = balance + 25000 WHERE account_id = 1006;
```

**Task 45: Increase all Savings balances by 5000**

```
UPDATE accounts SET balance = balance + 5000 WHERE account_type = 'Savings';
```

**Task 46: Change city for all Pune branch locations**

```
UPDATE accounts SET city = 'Pune City' WHERE city = 'Pune';
```

**Task 47: Increase credit score for Active accounts below 750**

```
UPDATE accounts
SET credit_score = credit_score + 10
WHERE status = 'Active' AND credit_score < 750;
```

**Task 48: Set Dormant where balance below 20000**

```
UPDATE accounts SET status = 'Dormant' WHERE balance < 20000;
```

**Task 49: Delete account\_id 1005**

```
DELETE FROM accounts WHERE account_id = 1005;
```

**Task 50: Delete account ACC10004**

```
DELETE FROM accounts WHERE account_number = 'ACC10004';
```

**Task 51: Delete Closed accounts**

```
DELETE FROM accounts WHERE status = 'Closed';
```

**Task 52: Delete low balance/low credit accounts**

```
DELETE FROM accounts
WHERE balance < 10000 OR credit_score < 600;
```

**Task 53: Delete Dormant accounts from a selected city**

```
-- Replace 'Pune City' with the selected city if required.
DELETE FROM accounts
WHERE city = 'Pune City' AND status = 'Dormant';
```

**Task 54: Add email column**

```
ALTER TABLE accounts ADD COLUMN email VARCHAR(100);
```

**Task 55: Add mobile column**

```
ALTER TABLE accounts ADD COLUMN mobile VARCHAR(15);
```

**Task 56: Change branch size**

```
ALTER TABLE accounts MODIFY COLUMN branch VARCHAR(100);
```

**Task 57: Rename customer\_name to name**

```
ALTER TABLE accounts RENAME COLUMN customer_name TO name;
```

**Task 58: Delete mobile column**

```
ALTER TABLE accounts DROP COLUMN mobile;
```

**Task 59: Add category, update two records, rename table**

```
ALTER TABLE accounts ADD COLUMN account_category VARCHAR(30);  
UPDATE accounts  
SET account_category = 'Regular'  
WHERE account_id IN (1001, 1002);  
RENAME TABLE accounts TO bank_accounts;
```

**Task 60: Describe, truncate, then drop table**

```
DESCRIBE bank_accounts;  
TRUNCATE TABLE bank_accounts;  
DROP TABLE bank_accounts;
```
